Descriptions:

Name/Title:	Search for a laptop by Search Bar
ID:	0
Description:	As a Computer Science undergraduate, I want to search for a specific laptop by its model name so that I can make sure it suits my programming needs.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application
Success Postcondition:	Laptop catalog changes to display laptops in relation to the text inputted into the search bar.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on search bar in home page 2. User types a string of text relating to a type or model of laptop 3. User clicks the search button next to the search bar.	4. Laptop catalog changes to display laptops in relation to the text inputted into the search bar.

Name/Title:	Filter the catalog by a category
ID:	1
Description:	As a user, I want to filter laptops by price so I can find a laptop that fits my budget.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application

Success Postcondition:	Laptop catalog changes to display laptops in relation to the filter chosen.

USER STEPS:	**SYSTEM RESPONSE**:
1. User views “Filters” section of the homescreen 2. Use decides which filter to manipulate 3. User selects “<filterName>” checkbox under “<filterCategory>” 4. User clicks the “Apply Filters” button	5. Laptop catalog changes to display laptops in relation to the filter chosen.

Name/Title:	Open a specific laptop’s page
ID:	2
Description:	As a consumer, I want to view a page of information about a laptop I’m considering buying so that I know whether or not the laptop is good for basic office tasks.
Related Use Cases:	Extensions: 4 - Favorite a laptop page
Precondition:	User is on Home page of the application
Success Postcondition:	The selected laptop’s page is visibly loaded onto the user’s screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on a laptop link listed on the visible catalog	2. The selected laptop’s page is visibly loaded onto the user’s screen.

Name/Title:	Go to/refresh Home page
ID:	6
Description:	As an indecisive consumer, I want to be able to navigate back to the starting place of a website so that I can quickly start my experience from scratch when I make a decision I realize isn't helpful.
Related Use Cases:	N/A
Precondition:	N/A
Success Postcondition:	The Home page is visibly (re)loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks the SpecEffect logo or the "Home" button on the top left of the screen	2. The Home page is visibly (re)loaded onto the user's screen.

Name/Title:	Open Glossary page
ID:	7
Description:	As a grandparent, I want a place to find the definitions of terms I'm unfamiliar with so that I know what kind of laptop to get my granddaughter.
Related Use Cases:	Extensions: 8 - View Glossary Category, 15 - Return to top of Glossary Page
Precondition:	N/A
Success Postcondition:	The Glossary page is visibly loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on the “Glossary” button just below the logo header	2. The Glossary page is visibly loaded onto the user’s screen.

Name/Title:	View Glossary category
ID:	8
Description:	As a consumer on borrowed time, I want to access a shortcut to view specific computer information so I don't have to waste time scrolling down to try and find it.
Related Use Cases:	N/A
Precondition:	User is on the Glossary page of the application
Success Postcondition:	The page is automatically scrolled down to the user’s chosen category of the glossary.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on a category from the glossary’s table of contents, located at the top of the Glossary page.	2. The page is automatically scrolled down to the user’s chosen category of the glossary.

Name/Title:	Open About Page
ID:	9
Description:	As a potential employer, I want to view info regarding the makers of a laptop catalog application so that I can know who was responsible for what and what the goals of the application is.

Related Use Cases:	N/A
Precondition:	N/A
Success Postcondition:	The About page is visibly loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on on the "About" button just below the logo header	2. The About page is visibly loaded onto the user's screen.

Name/Title:	Login to Admin Panel
ID:	10
Description:	As an administrator, I want to be able to modify laptop entries from the site using the site's interface so that I can quickly make edits without directly interacting with the database.
Related Use Cases:	Extensions: 11 - Add a Laptop Entry to Site, 12 - Remove Laptop Entry from Site, 13 - Add a Glossary Definition to Site, 14 - Remove a Glossary Definition from Site
Precondition:	User is on the Home page of the application
Success Postcondition:	User successfully logs in, and the application displays the admin panel screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on the “Admin Login” button	
	2. System changes display to the login screen
3. User types their username into the username field.	
4. User types their password into the password field.	
5. User clicks the “Login” button.	6. System checks the credentials.
	7. System approves the user
	8. System changes display to show the admin panel.

Name/Title:	Add a Laptop Entry to Site
ID:	11
Description:	As an administrator, I want to be able to modify laptop entries from the site using the site’s interface so that I can quickly make edits without directly interacting with the database.
Related Use Cases:	Extends from: 10 - Login to Admin Panel
Precondition:	User is on the admin panel screen
Success Postcondition:	A new laptop record is added to the site catalog; a success message is displayed.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on the “Laptop Database” button.	
	2. System displays a menu with add button and list of all laptops in database.
3. User clicks on the “Add” button.	
	4. System displays a menu with fields to enter laptop details.
5. User enters laptop name, model number, specifications, etc into respective fields.	
6. User presses the “Save” button.	
	7. System saves and adds the provided laptop record to the database.
	8. System adds the provided laptop record to the catalog
	9. System displays a message stating the process was successful.

Name/Title:	Remove Laptop Entry from Site
ID:	12
Description:	As an administrator, I want to be able to modify laptop entries from the site using the site’s interface so that I can quickly make edits without directly interacting with the database.
Related Use Cases:	Extends from: 10 - Login to Admin Panel
Precondition:	User is on the admin panel screen
Success Postcondition:	An existing laptop entry is removed from the database and catalog on the site; a success message is displayed.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on the “Laptop Database” button.	
	2. System displays a menu with add button and list of all laptops in database.
3. User clicks on a laptop’s “Remove” button.	
	4. System removes laptop record from the database.
	5. System removes laptop record from catalog.
	6. System displays a message stating the process was successful.

Name/Title:	Add a Glossary Definition to Site
ID:	13
Description:	As an administrator, I want to be able to modify glossary entries using the interface so that I can ensure the site stays up-to-date with current information.
Related Use Cases:	Extends from: 10 - Login to Admin Panel
Precondition:	User is on the admin panel screen
Success Postcondition:	A new glossary definition record is added to the glossary page; a success message is displayed.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on the “Glossary Database” button.	
	2. System displays a menu with an add button and a list of all glossary definitions in the database.
3. User clicks on the “Add” button.	
	4. System displays a menu with fields to enter definition details.
5. User enters a term into the term field.	
6. User enters a definition into the definition field.	
7. User presses the “Save” button.	
	8. System saves and adds the provided glossary definition record to the database.
	9. System adds the provided glossary definition record to the glossary page.
	10. System displays a message stating the process was successful.

Name/Title:	Remove a Glossary Definition from Site
ID:	14
Description:	As an administrator, I want to be able to modify glossary entries using the interface so that I can ensure the site stays up-to-date with current information.
Related Use Cases:	Extends from: 10 - Login to Admin Panel
Precondition:	User is on the admin panel screen
Success Postcondition:	An existing glossary definition entry is removed from the database and glossary page on the site; a success message is displayed.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on the “Glossary Database” button.	
	2. System displays a menu with an add button and a list of all glossary definitions in the database.
3. User clicks on a glossary definition’s “Remove” button.	
	4. System removes glossary definition record from the database.
	5. System removes glossary definition record from catalog.
	6. System displays a message stating the process was successful.

Name/Title:	Return to top of Glossary Page
ID:	15
Description:	As a consumer with trackpad issues, I want there to be a shortcut to navigate to the top of a page so that I’m not stuck having to scroll up manually.
Related Use Cases:	Extends from: 7 - Open Glossary Page
Precondition:	User is viewing the Glossary page and has scrolled down so the table of contents is no longer visible.
Success Postcondition:	The screen is returned to the top of the page with the table of contents visible.

USER STEPS:	**SYSTEM RESPONSE**:
	1. After the user scrolled down the page, the system updates the display to show a small button with an up arrow.
2. User clicks the button with the up arrow.	

	3. System automatically scrolls the page back to the top, where the table of contents is visible.

Sprint 6

Name/Title:	Hover over a term for more information
ID:	3
Description:	As a tech-beginner, I want to display descriptions within SpecEffect when hovering over complex tech-vocabulary so that I can understand what each specification means without needing prior experience.
Related Use Cases:	N/A
Precondition:	User is on either the Home page or a specific laptop's page (where terms would be)
Success Postcondition:	A box of text describing the word/term becomes visible on the user's screen for as long as the user hovers over it.

USER STEPS:	**SYSTEM RESPONSE**:
1. User finds a computer-related term	
2. User hovers over the text with their mouse pointer or finger	3. A box of text describing the word/term becomes visible on the user's screen for as long as the user hovers over it.
4. User stops hovering over text	5. The box of text disappears from the user's screen.

Name/Title:	Favorite a laptop page
ID:	4
Description:	As a user, I want to be able to save certain devices so that I can easily return to them later in a different session.
Related Use Cases:	Extends from: 2 - Open a specific laptop's page
Precondition:	User is on a specific laptop's page
Success Postcondition:	A pop up below the page header becomes visible on the user's screen, saying the laptop has been added to favorites.

USER STEPS:	**SYSTEM RESPONSE**:
1. User click the "Favorite Laptop" button	2. System adds the favorited laptop's information to local storage of favorites 3. A pop up below the page header becomes visible on the user's screen, saying the laptop has been added to favorites.

Name/Title:	Access Favorited Laptops
ID:	5
Description:	As a recurring user, I want to access a shortcut that shows me laptops I've liked before so I don't have to spend extra time searching for them again.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application
Success Postcondition:	The user's previously favorited laptops are visibly loaded onto the user's screen in the box of results below the search

	bar, or a message that says there are no favorited laptops if the user hasn't favorited any laptops previously.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks the “Favorited Laptops” checkbox in the filters tab. 2. User clicks the “Apply Filters” button	3. The user’s previously favorited laptops are visibly loaded onto the user’s screen in the box of results below the search bar, or a message that says there are no favorited laptops if the user hasn't favorited any laptops previously.
