Descriptions:

Name/Title:	Search for a laptop by Search Bar
ID:	0
Description:	As a Computer Science undergraduate, I want to search for a specific laptop by its model number so that I can make sure it suits my programming needs.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application
Success Postcondition:	Laptop catalog changes to display laptops in relation to the text inputted into the search bar.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on search bar in home page 2. User types a string of text relating to a type or model of laptop	3. Laptop catalog changes to display laptops in relation to the text inputted into the search bar.

Name/Title:	Filter the catalog by a category
ID:	1
Description:	As a user, I want to filter laptops by price so I can find a laptop that fits my budget.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application
Success Postcondition:	Laptop catalog changes to display laptops in relation to the filter chosen.

USER STEPS:	**SYSTEM RESPONSE**:
1. User views “filter by” selection 2. Use decides which filter to manipulate 3. User selects “filter by <filterName>” button	4. Laptop catalog changes to display laptops in relation to the filter chosen.

Name/Title:	Open a specific laptop's page
ID:	2
Description:	As a consumer, I want to view a page of information about a laptop I'm considering buying so that I know whether or not the laptop is good for basic office tasks.
Related Use Cases:	Extensions: 4 - Favorite a laptop page
Precondition:	User is on Home page of the application
Success Postcondition:	The selected laptop's page is visibly loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks on a laptop link listed on the visible catalog	2. The selected laptop's page is visibly loaded onto the user's screen.

Name/Title:	Hover over a term for more information
ID:	3
Description:	As a tech-beginner, I want to display descriptions within SpecEffect when hovering over complex tech-vocabulary so that I can understand what each specification means without needing prior experience.
Related Use Cases:	N/A
Precondition:	User is on either the Home page or a specific laptop's page (where terms would be)
Success Postcondition:	A box of text describing the word/term becomes visible on the user's screen for as long as the user hovers over it.

USER STEPS:	**SYSTEM RESPONSE**:
1. User finds a computer-related term 2. User hovers over the text with their mouse pointer or finger 4. User stops hovering over text	3. A box of text describing the word/term becomes visible on the user's screen for as long as the user hovers over it. 5. The box of text disappears from the user's screen.

Name/Title:	Favorite a laptop page
ID:	4
Description:	As a user, I want to be able to save certain devices so that I can easily return to them later in a different session.
Related Use Cases:	N/A
Precondition:	User is on a specific laptop's page
Success Postcondition:	A pop up below the page header becomes visible on the user's screen, saying the laptop has been added to favorites.

USER STEPS:	**SYSTEM RESPONSE**:
1. User click the "Favorite Laptop" button	2. System adds the favorited laptop's information to local storage of favorites 3. A pop up below the page header becomes visible on the user's screen, saying the laptop has been added to favorites.

Name/Title:	Access Favorited Laptops

ID:	5
Description:	The user can visit a page of the application where they can quickly view a selection of laptops that they have previously visited and saved.
Related Use Cases:	N/A
Precondition:	User is on Home page of the application
Success Postcondition:	The Favorites page is visibly loaded onto the user's screen with the laptops the user has previously favorites, or a message that says there are no favorited laptops if the user hasn't favorited any laptops previously.

USER STEPS:	**SYSTEM RESPONSE**:
1. User clicks the "Favorited Laptops" button	2. The Favorites page is visibly loaded onto the user's screen with the laptops the user has previously favorites, or a message that says there are no favorited laptops if the user hasn't favorited any laptops previously.

Name/Title:	Go to/refresh Home page
ID:	6
Description:	The user can click a button to refresh or go back to the Home page of the application.
Related Use Cases:	N/A
Precondition:	N/A
Success Postcondition:	The Home page is visibly (re)loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks the SpecEffect logo on the top left of the screen	2. The Home page is visibly (re)loaded onto the user's screen.

Name/Title:	Open Glossary page
ID:	7
Description:	As a grandparent, I want a place to find the definitions of terms I'm unfamiliar with so that I know what kind of laptop to get my granddaughter.
Related Use Cases:	Extensions: 8 - View Glossary Category
Precondition:	N/A
Success Postcondition:	The Glossary page is visibly loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on the "Glossary" button just below the logo header	2. The Glossary page is visibly loaded onto the user's screen.

Name/Title:	View Glossary category
ID:	8
Description:	A user can scroll down to a categorical section of the glossary by clicking a category from a table of contents located at the top of the Glossary page.
Related Use Cases:	N/A
Precondition:	User is on the Glossary page of the application

Success Postcondition:	The page is automatically scrolled down to the user's chosen category of the glossary.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on a category from the glossary's table of contents, located at the top of the Glossary page.	2. The page is automatically scrolled down to the user's chosen category of the glossary.

Name/Title:	Open About Page
ID:	9
Description:	A user can open a page to see info about the application itself, the people who made it, and their goals with the app.
Related Use Cases:	N/A
Precondition:	N/A
Success Postcondition:	The About page is visibly loaded onto the user's screen.

USER STEPS:	**SYSTEM RESPONSE**:
1. The user clicks on on the "About" button just below the logo header	2. The About page is visibly loaded onto the user's screen.
